Call for proposals-Fall 2025 Interprofessional Care Team Expansion

The Ontario government has launched the 2026–2027 call for proposals to create and expand approximately 75 new primary care teams to connect 500,000 more people to primary care. This is part of the more than \$2.1 billion that the province is investing to support Ontario’s [Primary Care Action Plan](#). This will connect everyone in the province to primary care by 2029.

Primary care clinicians and teams are invited to submit proposals for funding consideration through their associated Ontario Health Team (OHT) and Primary Care Network (PCN). All OHTs and their PCNs are eligible to submit a set number of proposals.

Who is eligible to apply

Primary care practices and clinicians working with their OHT and PCN can submit a proposal to create or expand one of the existing team-based models:

- Family Health Teams
- Community Health Centres
- Nurse Practitioner-Led Clinics
- Indigenous Primary Health Care Organizations

The CCHOHT will be coordinating the submission of *one collaborative proposal* inclusive of our Halton Hills, Milton and Oakville Communities and leveraging the Primary Care Action Planning work and report that will be released mid -October that engaged multiple primary care providers, partners, patients, caregivers and families in its development.

Interested Primary Care Providers looking to roster patients as well as organizations who could support these expansion efforts should contact info@cchoht.ca and indicate in the subject line: Interest in participating in Fall 2025 call for proposals. You will then be added to our communications for collaborative planning into this submission which is due Nov 14th at 5:00pm.

For full information on the fall 2025 call for proposals please see:
